Can a power inverter charge an 80 volt battery?

Yes, this compact power inverter can charge an 80V battery. I snap my 80V battery in it and the wife's iPad is charging! Best of all, it is super easy to swap out the 80V batteries, meaning we have hours of power.

What power requirements does the inverter have?

A: Hi emunee, Thank you for your question. When using the Greenworks 80V 300W inverter, ensure that any products plugged into it must be less than 120V and pull 300 Watts or less.

How much does an inverter cost?

At the average \$0.18 per watt and with the average installation costing \$2.93 per watt, inverters usually account for about 6% of total installation costs. This means that a typical 5.6-kilowatt installation costs \$16,408 in total and the inverter should account for about \$1,000 of that.

What ports does the power inverter have?

The power inverter has 2 USB-A ports. It is great having these ports, but it would be wonderful if it included 1 USB-C port.

How do you calculate the run time of an inverter?

To calculate the approximate run time in hours for the Greenworks 80V 300W inverter, divide the watt-hour rating of the battery (sold separately) by 300.

What is the DC input voltage of the inverter?

This inverter has a DC input of 115V, which means it will work with your RESMed Air Sense 10 CPAP machine. The machine only draws a total of 53W and this inverter allows for up to 300W of power.
