### **Australia Solar Air Conditioning**

Are solar air conditioning units a good choice for Australians?

Solar air conditioning units are increasingly becoming a popular choicefor Australians, given the country's sunny climate. Solar AC systems use the sun's thermal energy to power the compressor and fans, which helps to cool the air inside your home.

#### What is solar air conditioning?

'Solar air conditioning refers to any air conditioning (cooling) system that uses Solar energy' - Wikipedia This can be done through passive solar, solar thermal energy conversion and photovoltaic conversion (sunlight to electricity - PV). All of our solar air conditioners use solar PV power.

### What is a hybrid ACDC solar air conditioner?

This Hybrid ACDC Air Conditioner allows you to harness natural and free energy from the sun to run your solar Air Conditioning unit for next to nothing in energy costs. Hybrid ACDC solar air conditioners need no batteries, and only a few PV panels to deliver a huge saving.

#### Should you invest in solar air conditioning in Australia?

With Australia being one of the hottest countries, air conditioners can be found in almost every home. However, it's soon obvious to anyone who purchases an air conditioner that the most significant outlay is the ongoing running costs. But there may now be a way to mitigate these costs. And that's by investing in solar air conditioning.

#### How do I get solar air conditioning in Australia?

To get solar air conditioning in Australia you'll need to find a licensed solar installerwho can help you to fit the system to your home. It should be noted that solar powered air conditioning requires its own set of solar panels and inverter system.

### Are solar powered air conditioners a good idea?

Solar powered air conditioners can help reduce your energy billby using free energy from the sun instead of expensive electricity. Environmentally Friendly: Solar power is a clean and renewable source of energy, so using solar powered air conditioning can help reduce your carbon footprint.
