

Do you need an uninterruptible power supply (UPS)?

If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). We've reviewed our recommendations and are confident these are still the best UPS devices you can buy. Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

Why should you choose an IFP series ups?

It is ideal for PC users or small business companies, as well as for small telecom applications. The iFP series is equipped with AVR to reduce the impact of unstable voltage on equipment. The intelligent UPS' functions can also provide power during outages, and the battery automatically charges when power is restored.

How many power sockets does the APC ups have?

This UPS from APC has eightsurge-protected power sockets, four of which are covered by the battery backup. All of the eight sockets can take standard three-pin plugs, making it more convenient than the kettle leads found on some UPS systems.

Why should you choose an UPS system with multiple battery modules?

In UPS systems with several battery modules, an optimized load distribution is used: some of the modules remain on standby and are only activated when there is a higher power demand. In this way, the UPS not only provides reliable protection, but also ensures efficient and long-lasting use of its components.

What is the best uninterruptible power supply for mid-range PCs?

Though the lack of a USB port limits the versatility of this model, we still highly recommend the Back-UPS Proas the best uninterruptible power supply for mid-range PCs! If you need an uninterruptible power supply on a budget, in the event of an outage, then Tripp Lite's AVR750U is an affordable must-buy.
