

How big is the battery pack market?

Enjoy complimentary customisation on priority with our Enterprise License! The battery pack market size is forecast to increase by USD 124.4 billion at a CAGR of 14.48% between 2023 and 2028. The market is experiencing significant growth, driven by several key trends and factors.

What is the global battery pack market?

The global battery pack market is highly fragmented, with a large number of major players accounting for majority market revenue share. Major players are focusing on research and development activities in order to leverage opportunities and increase revenue share.

What is driving the growth of battery pack market?

Automotive and energy industry behemothsin North America and Europe have driven the growth of battery pack market. Increasing demand for electric vehicles and clean energy in emerging nations of Asia Pacific and other parts of the world are also driving factors for the battery pack market in these regions.

What are the key factors affecting the battery pack market?

The battery pack market is likely to be hampered by fire risk,low conversion efficiency,and high raw material costs. The Phone battery pack segment is expected to register an 18.4% market CAGR throughout the forecast period. By product type, the market is segmented into laptop battery pack, power battery pack, phone battery pack, and others.

What is the market size of phone battery pack segment?

The Phone battery pack segment is expected to register an 18.4% market CAGR throughout the forecast period. By product type, the market is segmented into laptop battery pack, power battery pack, phone battery pack, and others. Phone battery pack segment is expected to register a relatively faster revenue CAGR over the forecast period.

Why is the portable battery market growing in Europe?

Robust presence of key market players, early adoption of advanced technologies, and rising demandfor portable battery packs are some key factors driving revenue growth of the market in this region. Europe accounted for second-largest market share in the global market in 2020.

The battery pack dominates. Over 50% of powertrain component revenues currently come from the battery pack alone. Battery pack revenue growth is set to peak in 2026 before slowly decreasing in share as fuel cell technologies begin ...
