

Can you bring a power bank on a plane?

You can bring a typical personal power bank,up to 100 watt hours. However,multiple airlines have now introduced new rules regarding them. That's because a fire erupted on a plane caused by one of the portable lithium batteries. Korean airline Air Busan's plane was wrecked on January 28,2025 when it caught fire on the runway. Nobody was hurt.

Are portable power banks a must-have when travelling?

They have become a packing must-have when travelling. But changes are happening with the rules on taking portable power banks to charge your mobile on board planes. While there has long been a rule that you must pack them in your hand luggage, airlines are now going further and insisting on bans, because of fire risks.

Can power banks go in checked luggage?

The TSA does say this about power banks: So according to the TSA "portable chargers or power banks containing a lithium ion battery must be packed in carry-on bags." Power banks packed in checked luggage will be confiscated by the TSA. This doesn't mean that all devices containing lithium batteries can't go in checked luggage.

How many watts can you carry on a power bank?

Airlines have specific rules regarding battery capacity and usage. Most airlines allow power banks with a capacity of up to 100 watt-hours(Wh) in carry-on luggage. Some airlines may allow between 100-160 Wh with approval, while power banks exceeding 160 Wh are typically forbidden.

Was a portable power bank a source of a plane fire?

A portable power bank with a lithium battery has been found to be a possible source of a firethat engulfed an Air Busan plane in January while waiting for takeoff, South Korea's transport ministry said in a press release, citing the investigation committee and forensic services.

How many power banks can I take on a plane?

Air India: up to 20 power banksper person; none can exceed 100Wh. Even our national airline company - Tarom Romania - complies with the same rules: 2 power banks maximum per person, in carry-on baggage only, and you need approval from the airport agents if your power banks have a capacity larger than 100Wh. Batteries over 160Wh are forbidden.

The power bank(s) you bring on board must be for your own personal use, not for sale or distribution. If you have a portable battery rated between 101 and 160 watt hours, you can obtain airline approval to carry this power bank on the plane. However, you can only carry up to two battery packs of this size onto the airplane.
