

Why is energy storage important in Bangladesh?

The technical system characteristics of the Bangladesh power system are favorable for energy storage to reduce the cost of supply during peak demand periods and improve system reliability. Bangladesh's energy policy framework does not articulate a clear vision for energy storage in the country.

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

Who governs Bangladesh's energy sector?

At the national level, Bangladesh's energy sector is governed by the MPEMR. Within MPEMR's Power Division, the Power Cell is responsible for implementing various power sector reform activities, such as developing the Power System Master Plans. The latest PSMP was released in 2016, followed by an updated revision in 2018.

What is Dhaka power distribution company?

The Dhaka Power Distribution Company covers most of the greater Dhaka area, the Dhaka Electric Supply Company covers the northern parts of the city, the West Zone Power Distribution Company covers the western regions such as Khulna and Barisal, and the Bangladesh Rural Electrification Board covers the distribution of electricity in rural zones.

Does Bangladesh support energy storage deployment?

While Bangladesh does not have specific programs or policies to support energy storage deployment, the policies developed to promote private sector investments illustrate how such programs could be implemented in the future.

Why do some thermal power stations have a capacity problem in Bangladesh?

In Bangladesh, some thermal power stations have a capacity problem due to a lack of O&M practice. This leads to the power production shortfall. Higher efficiency can be achieved by applying an appropriate O&M practice with sufficient skills, so that the plant capacity can be recovered.

The Power Division has taken the initiative through all distribution utilities to implement a pre-payment metering system with a view to reduce non-technical losses, increase the revenue collection, improve customer's service and reduce the accounts receivable.
