

Djibouti makes outdoor power

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

How does Djibouti produce electricity?

This is mostly supplied by thermal power plants that utilise oil and diesel as fuel. The two primary plants in Djibouti City have a combined generation capacity of roughly 122 MW, with two smaller plants located in Obock and Tadjoura.

What is Djibouti's new solar project?

The project will be the first solar Independent Power Project (IPP) in Djibouti and will be located in Grand Bara, south of Djibouti City. The solar project is being fully developed by AMEA Power under a Build-Own-Operate and Transfer (BOOT) model and will generate 55 GWh of clean energy per year, enough to reach more than 66,500 people.

Does Djibouti have solar energy?

Djibouti has significant solar energy potential, with an estimated average daily global horizontal irradiance of 4.5 to 7.3 KWh per sq metre across its territory. The construction of the first large-scale solar generation project began in November 2022 in the Grand Bara Desert, which is located in the country's southern region.

Will Djibouti use wind power in 2022?

The UAE-based Amea Power signed an agreement with the Ministry of Energy and Natural Resources in July 2022 to build a 30-MW solar plant. The energy produced will be sold to EDD under a power purchase agreement. Djibouti is also looking to exploit the untapped potential of wind power.

Does Djibouti have a monopoly on electricity?

It should be noted that the state-owned company *Electricité de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP). "This site has the best wind energy potential in Africa, alongside Tangiers in Morocco," says François Maze, its CEO.

Djibouti outdoor solar power station Not to be confused with Engie Grand Bara Solar Power Station The Amea Grand Bara Solar Power Station is a planned 25 MW (34,000 hp) solar power plant in Djibouti. When commercially commissioned, it will be the country's first and largest grid-connected solar farm. Contact online >>>
