So far, the multi-criteria method for energy storage selection can be classified into two types: expert knowledge-based and data-driven. One typical expert knowledge-based method is fuzzy logic. Recently, Aktas and Kabak (Aktas and Kabak, 2021) developed a hesitant fuzzy linguistic group decision-making model for energy storage unit selection.

Shared energy storage has the potential to decrease the expenditure and operational costs of conventional energy storage devices. However, studies on shared energy storage configurations have primarily focused on the peer-to-peer competitive game relation among agents, neglecting the impact of network topology, power loss, and other practical ...
