

What are the major developments in the renewables sector in Slovenia?

The main developments in the renewables sector include the introduction of the National Energy and Climate Plan and the adoption of secondary legislation, aiming to make Slovenia a climate-neutral society in the coming decades and motivating private finance to invest in projects including renewable sources.

Why is Slovenia rethinking its energy policy?

Russia's February 2022 invasion of Ukraine,however,forced Slovenia to reconsider its energy policy and seek alternate sources. Slovenia does not have gas storage facilities,with companies dependent on infrastructure in Austria and Croatia.

Does Slovenia have gas storage facilities?

Slovenia does not have gas storage facilities, with companies dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in Krk, Croatia, or Rovigo, Italy, to diversify its supply away from Russia.

A few grid-scale battery storage projects are already underway in Slovenia, ... with a focus on the increasing integration of energy storage into regional grids, evolving government policies, and the growing need for energy ...

Battery storage systems at substations Okroglo and Pekre in Slovenia have started trial operations within a joint endeavor with Croatia. The two units have 5 MW each and a storage time of five hours, translating to 50 ...

Hyme Energy has put a molten hydroxide salt energy storage project into operation in Denmark, the first deployment in the world, it claimed. ... After an inauguration ceremony the facility will be put into operation to ...

On May 26, the world first non-supplementary combustion compressed air energy storage power station -- China "s National Experimental Demonstration Project J intan Salt Cavern Compressed Air Energy Storage, technologically developed by Tsinghua University mainly, was officially put into operation. ...

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started ...

Use of thermal energy storage technologies is the way to increase the share of solar energy in Slovenia even more. The European Directive 2009/28/EC of 23rd of April 2009 on the promotion of energy from renewable sources dictates that each Member State has to adopt a national renewable energy action plan (NREAP) for the

period 2010-2020.

Hydropower plant operator Hidroelektrarne na spodnji Savi (HESS) has officially opened Slovenia"s biggest solar power plant, with an installed capacity of 6 MW. Together with the Brezice hydropower plant, it ...

A project combining gas turbines and battery energy storage system (BESS) technology in the Czech Republic has been put into commercial operation, the largest in the country. Decci Group, an independent power producer (IPP), announced the completion of the hybrid "Energy Nest" project earlier this month (10 July).

By this step the precondition will be fulfilled to include the border between Hungary and Slovenia into the European market coupling projects for day -ahead (SDAC) and intraday (SIDC) timeframe. The timeline for tie-line inclusion into cross border capacity calculation processes is as follows: capacity calculation for day-ahead

Battery storage capacities at RTP Okroglo and RTP Pekre have been put into trial operation as part of the SINCRO.GRID project. The total rated power of both systems is 10 MW, and the rated capacity is 50 MWh.

With signing of the transaction early October 2016, SEEF provides financing for operational projects as well as projects which are currently in the pipeline once being put into operation. GGE as the owner of the energy efficiency project contracts has a significant track record in the market and will retain the operational responsibility vis-à ...

A few grid-scale battery storage projects are already underway in Slovenia, including two units totalling 60MW co-located with a run-of-river hydroelectric plant, as well as a new pumped hydro energy storage (PHES) ...

Following the launch of the first round of energy storage project bidding in 2023, Greece announced the winning list of the second round of energy storage project bidding in February this year, which included 11 BESS projects with a total scale of nearly 300 MW. These projects are required to be put into operation no later than December 31, 2025.

Completed in early January and put into trial operation in February, the project is composed of 34 domestically made "Ronghe 1" battery stacks and four groups of storage tanks, making it the largest of its kind in the world, said the company. ... As of the end of 2022, the total installed capacity of energy storage projects in China reached 59. ...

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly EUR14 million. Image: Ministry of Energy. A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

This investment is part of the innovative international smart-grid @SINCRO.GRID Project, which is co-financed by the EU. Within this project, two (x2) batteries of 5MW/25MWh (total of 50MWh) will be installed at two different ...

However, a lack of financial resources has postponed these projects. Since the change in government, Slovenia accelerated efforts to increase power generation from renewable sources, including solar and wind energy. The PM Golob government took steps to streamline the permitting process to make renewable energy projects more attractive.

The strategy of NGEN is to deploy both large-scale and small-scale energy storage projects and aggregate them into virtual power plants (VPP), combining their respective capabilities to provide a maximum array of ...
