

Guatemala DC Energy Storage Equipment Company

Whether your company prefers AC- or DC-integrated energy storage systems, comparing all available options used to take countless hours of data collection and analysis and still only be a partial view of the market. Then, once you found the best products for your project, contract negotiations were time-consuming and filled with headaches.

ESS Inc is a US-based energy storage company established in 2011 by a team of material science and renewable energy specialists. It took them 8 years to commercialize their first energy storage solution (from laboratory to commercial scale). They offer long-duration energy storage platforms based on the innovative redox-flow battery technology ...

Since 2008, the company has deeply cultivated the electric vehicle battery business, forming a whole industrial chain layout with battery cells, modules, BMS and PACK as the core, extending upstream to mineral raw materials, expanding downstream to the echelon utilization of electric vehicles, energy storage power stations and power batteries, and building an ...
