2. Domestic energy storage: Large-scale storage bidding is booming, and industrial and commercial energy storage is expected to benefit from peak and valley price differences that will continue to increase. 2.1 Analysis of large-scale energy storage: The winning bids are booming, and the scale of operation is close to the level of last year.

In scenario 2, energy storage power station profitability through peak-to-valley price differential arbitrage. The energy storage plant in Scenario 3 is profitable by providing ancillary services and arbitrage of the peak-to-valley price difference. The cost-benefit analysis and estimates for individual scenarios are presented in Table 1.
