[High efficiency conversion]: The inverter provides 12V 24V 48V 60V DC to 110/120V 220V/230V AC pure sine wave technology, with high conversion efficiency (>90%), low no-load loss, and more energy saving. [Pure Sine Wave Inverter]: Pure sine wave inverter provides true 3000W continuous power and 6000W peak power.

### What voltage does a 60V Inverter Supply?

The standard output voltage is 230 Volt,50Hz with a pure sine wave. This means that this inverter supplies the same type of voltage as the wall socket. This allows any electrical device to work on it. What should you be aware of? When choosing the right 60V inverter, these are the three most important points to consider:

#### What is a car inverter converter?

?Anti-interference Pure Sine Wave Inverter?The car inverter converter adopts pure sine wave technology,which has low interference,low noise and large load capacity,it is a voltage converterthat converts 12V /24V /48V /60V /72V DC into 110V/120V/220V/230V/240V AC. It can be used in emergencies,camping,cars,homes,RVs and solar energy.

#### Can a 12V 72V inverter be converted to each other?

A1: No,12V~72V cannot be converted to each other. You can only choose one of the input voltages, and the inverter input voltage must be consistent with the system input voltage. For example: a 72V inverter can only be used for a 72V battery.

### Is the 72V inverter suitable for 72V batteries?

The 72V inverter is only suitable for 72V batteries. - Before connecting the inverter,make sure that the inverter switch is turned off! - When using the inverter, please tighten the positive (+) and negative (-) terminals, otherwise the loose connections will become hot due to poor contact.

### What protection does the inverter offer?

[Protect your device]: Includes short circuit protection,input overvoltage/undervoltage protection,output short circuit,overload,overcurrent,and overtemperature protection. The durable aluminum housing protects the inverter from drops and bumps.

I recently purchased a cheap inverter to use as a backup power source for my gas furnace in the event of a power outage. (This is in the US). The inverter is 1500W continuous (3000 watts peak), which is adequate for my needs. 12V DC input, 110V Ac/60 Hz output. It is supposed to be a pure sine wave inverter, although I have no means to verify that.
