What is a 1200W micro inverter?

A 1200W micro inverter is a grid-tie solar inverter with 1200W power output. It features 433MHz wireless communication, wide input voltage range (22-50V DC), IP65 waterproof design, built-in high-performance MPPT function, and high efficiency.

What can you run with a 24v 1200w inverter?

With a 24v 1200w inverter, costing approximately R10 000, you could run a television, a computer, a gaming console, a internet router and one of two lights.

What happens if merc-1100/1300w-P is disconnected from inverter?

*3.When the MERC-1100/1300W-P is disconnected from inverter or when the inverter is off,its output voltage will become 1 V*4.It is for PV module frame/extruded aluminum profile racking system installation. *5.Pay attention to the PV module wire length.

What happens if merc-1100/1300w-P fails?

*2.Any power optimizer, which is connected to an operating inverter in a PV string, will be bypassed when it fails. *3.When the MERC-1100/1300W-P is disconnected from inverter or when the inverter is off, its output voltage will become 1 V *4.It is for PV module frame/extruded aluminum profile racking system installation.

What is the maximum DC power allowed in a PV module?

Max. DC power per string *1.The maimum power of PV module at STC shall NOT exceed the "Rated input DC power" of MERC-1100/1300W-P. PV Modules with up to ±10% power tolerance are allowed. *2.Any power optimizer, which is connected to an operating inverter in a PV string, will be bypassed when it fails.

What is the capacity difference between strings under the same inverter?

*9.It is recommended that strings under the same inverter have an equal capacity. If this is not feasible, the capacity difference between strings under the same inverter must not exceed 2 kW. Otherwise, the energy yield will be reduced. Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment.
