The Philippines is a tropical country with many islands that experiences high temperatures and humidity throughout the year. As a result, air conditioning is essential for many households. Unfortunately, this leads to high electricity costs for many Filipino homeowners. However, there's a bright solution: solar powered air conditioning.

This electricity powers the air conditioner directly or offsets energy consumption by feeding into the electrical grid. There are three main types of solar AC systems: Direct DC-Powered Systems: Run exclusively on electricity generated by solar panels, requiring no connection to the grid. These are ideal for off-grid locations.

First Hybrid Full DC solar - powered air conditioner, now available in the Philippines. Eco Friendly air conditioner becomes a necessity as it can greatly improve the quality of life..
