

Should you install an uninterruptible power supply system?

Installing an uninterruptible power supply system is advisable during short-term power outages and power surges, but the capacity of the UPS batteries is not enough for long-term operation of the equipment in the absence of a centralized power supply.

Is electricity supply in Kyiv difficult?

Kyryl Tymoshenko, Deputy Head of the Office of the President, has said that during the day on Sunday the situation with electricity supply in Kyiv was difficult, but the blackouts are controlled. Quote: "The situation as regards electricity supply to consumers in the capital is difficult today. Apparently, every resident of Kyiv is feeling it now."

How much power does Kyiv need a day?

Sergey Kovalenko, chief operating officer of YASNO, which provides energy to Kyiv, said the situation in the city has improved but still remained "quite difficult". He indicated that residents should have at least four hours of power per day.

What is uninterrupted guaranteed power supply?

Unstable power supply and power surges can interfere with electrical equipment and damage sensitive electronics. For such cases, a reliable system of uninterrupted guaranteed power supply is needed, which will protect electrical appliances and provide an alternative power supply.

What is uninterrupted power supply?

The task of uninterrupted power supply is to gain time for a regular shutdown of energy consumers and save data. In the event of a prolonged failure of the main network, the uninterruptible power supply system (SGE) maintains the supply of electricity to the pantographs by autostarting the diesel generator set (DGU) and switching the load to it.
