Next to the square paddocks was a long rectangular paddock that housed two senior geldings who shared special dietary requirements. This setup was an efficient use of their land, allowing each horse"s needs to be individually met. Paddock Terminology - Paddock vs. Corral What one rider may call a "paddock", another may call a "corral ...

The retrofit solar system powers the LED street light from the battery and sends extra energy back to the grid. The refinery can use the extra energy to power other consumers or sell it to utilities. The new generation of LED lights is a low-energy consumer and provides brighter illumination than the older 250W lamps. The
