The basic rule of physics that watts = volts x amps is based on direct current circuits. Alternating current (AC) supplies buildings and equipment with energy. AC is more efficient for power companies to deliver, but when it hits the equipment's transformers, it exhibits a characteristic known as reactance. Reactance reduces the useable power (watts) that is ...

Battery UPS Capacity. While the load represents the total equipment the UPS will be tasked with protecting, you also must determine how much time you want that load to stay up and running during a power outage. This will establish the UPS runtime. Every UPS has an internal battery that will supply a limited amount of power if the utility supply ...
