

Can a 220V inverter be used in series?

Re: 220v from two inverters? You can put in series(two 120 VAC units into "one" 240 VAC w/neutral unit),if the units you have have been designed for synchronized operation (I believe, with an external control cable that runs between the two units--such as some Outback units will).

#### Which Inverter should I Choose?

If you need the inverter to run the resistive load (like laptop,TV,electric cooker,LED light),please choose the inverter with continuous power higher than the appliance's rated power. compatible with example,compatible with the power inverter with continuous power 2500w,it is suggested to run the appliance with rated power less than 2500w.
