

How can I obtain data from an Omnik inverter?

For older Omnik inverters, it is not possible to get the data straight from the inverter. However, newer inverters listen at port 8899 and are able to respond directly. The datalogger in the inverter sends an update about every 5 minutes to a fixed IP of a logging server in the Solarman datacenter.

How to set language in Omnik inverter?

0.0.0.0) 7.3 Set Language The Omnik inverter provides several languages for users to use. At the entry of "Set Language", press the key for approx. 5 seconds, you can enter the language selection menu. Choose the language which you need with the function key, and keep this state without any...

What should I do if my Omnik inverter is damaged?

4. Packing checklist 4.1 Assembly parts After you receive the Omnik inverter, please check if there is any damage on the carton, and then check the inside completeness for any visible external damage on the inverter or any accessories. Contact your dealer if anything is damaged or missing.

Can Omnik deny warranty service?

Any unauthorized actions including modification of product functionality of any form will affect the validation of warranty service; Omnik may deny the obligation of warranty service accordingly. NOTICE Public utility only The PV inverter designed to feed AC power directly into the public utility power grid, do not connect AC output of the...

Can Omnik make unauthorized perforations or modifications?

No unauthorized perforations or modifications Any unauthorized perforations or modifications are strictly forbidden, if any defect or damage (device/person) is occurred, Omnik shall not take any responsibility for it.
