

the inverter per PV Watt. With a DC-Coupled photovoltaic PV storage system, the DC/AC ratio goes as high as 2.5, allowing for a lot of PV power being fed through a relatively small inverter, whereas PV power gets lost in the summer with a PV inverter in an AC-Coupled system, starting from a DC/AC ratio of approx. 1.3.

As photovoltaic inverter technology advances, the intelligence of energy storage systems will also improve. Through advanced algorithms and IOT technology, the inverter realizes functions such as remote monitoring, fault diagnosis, and intelligent dispatch. This makes the energy storage system more efficient, safe, and reliable.
