

Can you use a 24V power inverter with a 48v battery?

Similarly,if you'll be using a 48V battery,you'll need a 48V power inverter. However; you can still use a 24V power inverter with a 48V battery. But going the other way won't be advisable and this is because the voltage of the battery must match,or larger the voltage of the power inverter in order for it to work properly.
