

What is the oldest hydropower plant in Slovenia?

Today, the oldest hydropower plant in the Slovenian part of the Drava River operates with three aggregates and after a renovation it has become one of the most modern in the country, without crew and under a remote-control supervision. Falaannually produces approximately 260 GWh of electricity.

What are the major developments in the renewables sector in Slovenia?

The main developments in the renewables sector include the introduction of the National Energy and Climate Plan and the adoption of secondary legislation, aiming to make Slovenia a climate-neutral society in the coming decades and motivating private finance to invest in projects including renewable sources.

What is a pumped storage power plant?

Pumped Storage Power Plants are an important element in developed power supply systems with high percentage of continuous non-variable power generating, where surplus energy occurs during the period of low consumption and simultaneously there are great needs for peak energy.

Avce in Slovenia. This 178-mw project, being developed on the Soca River in Kanal, Slovenia, is the country"s first pumped-storage project. ... Verbund Austrian Hydro Power is developing this 480-mw project, part of the Glockner Kaprun scheme, near the 240-mw Kaprun project. ... Public Utilities Commission has modified General Order 167 to ...

Hydropower provides various services to the power system. Hydropower is able to schedule energy production in the long and short term and provides physical rotation mass for grid stabilization. Additionally, pumped storage hydropower offers a huge capacity of stored energy, which can be available at any time. Through

The pumped storage project will have storage for 7.5 hours. Its capacity will be increased to 1.92GW with six hours of storage to provide a total storage of approximately 11GWh daily. According to the Indian company, the ...

Queensland"s new premier David Crisafulli said the government will focus on "smaller, more manageable" PHES. Image: Mick de Brenni MP. The newly elected Queensland government has pulled the plug on what would have been the world"s largest pumped hydro energy storage project (PHES) with a capacity of 120GWh.

The ACEN Phoenix Pumped Hydro Energy Storage project, located near Lake Burrendong, was awarded a Long Duration Storage Agreement (LTESA), marking a significant milestone in the state's efforts to replace retiring coal-fired power plants. The project will provide 800MW of power with a storage capacity of 11,990MWh, offering up to 15 hours of ...

The JEK2 project aims to build a new nuclear power plant in Slovenia, near the existing Krsko facility. This site, which houses a 696 MWe pressurized water reactor, generates about one-third of the country"s electricity. The project could include one or two reactors, with a total capacity of up to 2400 MW. An Investment of Several Billion Euros

Slovenia state-owned utility Dravske elektrarne Maribor (DEM) is planning two battery storage units totalling 60MW co-located with an existing hydroelectric unit, as well as a new pumped hydro energy storage (PHES) plant.

Tesla-based battery project launched in Slovenia. Energy storage start-up NGEN has announced the launch of a 12.6 MW/22.6 MWh battery system in northwestern Slovenia. The business was set up in the middle of last year to bring to fruition a grid ... The Kozjak pumped hydropower project in Slovenia consists of a 440 MW plant and a 400 kV ...

The Energy Agency of Slovenia approved subsidies for 43 projects, of which 36 are for solar power plants with capacities from just 45 kW to 1.3 MW. The government covers the difference between the accepted price for the project benefitting from the mechanism and the benchmark electricity price, for the facility"s planned annual output.

Two canoes carried 14 people in what was called "The Last Descent" before completion of the Blanca project, owned by Slovenia utility Holding Slovenske Elektrarne. (HNN 8/21/07) Local media said the canoes entered the area near the ...

Minister of Mining and Energy of Serbia Dubravka Dedovic Handanovic spoke with Chief Representative of the Balkan Office of Japan International Cooperation Agency (JICA) Masahiro Ueki about the financing and construction of the Bistrica pumped storage hydropower plant. It is the first project of its kind in the country after three decades ...

By 2020, a fifth of all energy consumption in European Union (EU) member countries must come from renewable sources - hydro, wave, solar, wind, and biomass. This mandate, which EU leaders signed in March 2007, is part of a proposal designed to cut greenhouse gas emissions by 20 percent (compared with 1990 levels).

Elsewhere a 500MW project in California and a 450MW project in Scotland are at different stages of gaining approval. Tâmega will provide around half the pumped hydro power of the largest existing pumped hydro plant in ...

DEM runs the hydroelectric portfolio of state-owned HSE Group, including the Zlatolicje run-of-river hydro plant. Image: HSE Group / DEM. Slovenia state-owned utility Dravske elektrarne Maribor (DEM) is planning

two ...

Hydropower plant operator Hidroelektrarne na spodnji Savi (HESS) has officially opened Slovenia"s biggest solar power plant, with an installed capacity of 6 MW. Together with the Brezice hydropower plant, it makes a hybrid system. At the same time, Brezice"s water reservoir will provide energy storage.

Hydro operator Dravske Elektrarne Maribor d.o.o. (DEM) seeks bids for supply of pump-turbines and motor-generators for the 400-MW Kozjak pumped-storage project. Bids are due August 8. DEM seeks two 220-MW reversible vertical Francis turbines and two 230-megavolt-ampere motor-generators.

Slovenia is moving ahead with the construction of the JEK2 nuclear power plant to strengthen its energy security and meet its energy objectives. Slovenia is preparing to build a new JEK2 nuclear power plant, with a maximum capacity of 2400MW, to boost energy security and decarbonization.

It is the first Pumped Storage Power Plant in Slovenia and the first Reversible Pumped Storage Power Plant of this type in Europe. AVCE PSPP generates 426 GWh of electricity per year. The key advantage of this Power Plant is ...

A hydroelectric power water reservoir in Morroco. Image: l"Office National de l"Electricité (ONEE). A roundup of energy storage news from across the continent of Africa, with Morocco"s ONEE shortlisting bidders for a pumped hydro project, Somalia launching a grid-scale solar and storage tender, and a microgrid pairing grid-scale solar, BESS and diesel at a mine ...

Under the framework, the European Commission approved a EUR 150 million state aid scheme for Slovenia to promote the use of renewable energy, heat, and energy storage. The approved state aid will help Slovenia achieve its current target of ensuring at least a 27% share of renewable energy in total energy consumption by 2030 and of having two ...

It is shown that the current energy storage capacity of Slovenia's only pumped storage plant will be sufficient to offset the introduction of new non-dispatchable renewable energy sources by 2030.

The reports indicate the hydropower plants are run-of-river, while NEK also has substantial pumped hydro energy storage (PHES) plants both operating and in construction across Bulgaria. ... European Investment Bank has committed EUR108 million to upgrades at a pumped hydro energy storage (PHES) project in Extremadura, Spain.
