

It's not a must for every farmer, but if you find that spoiled food is a constant cost to your business, solar energy may be the solution. A solar powered water pump is an ideal way to reduce the cost of irrigating crops or watering livestock.

Instead of using grid electricity, a solar-powered water pump utilise electricity generated by photovoltaic panels or radiated heat energy gathered from the sun. These pumps are used on a modest scale, and their usage is still in early stages of deployment.

Some of the best options available today include models from PWS,Vevor,Amarine-made,Eco-Worthy,and Jenenseries. A solar water pump is perfect for living off the grid and for those who want to keep their power bills down while helping the environment.
