For me, though all four 1000 watt pure sine wave inverters above are decent picks, I have to go with either the AIM POWER 1000 watt inverter or the GO POWER 1000 watt sine wave inverter. The AIM and GO POWER has US based support and it may make things easier if anything goes off the rails, so to speak.

Yet, it's uncommon to find an inverter over 11,000 watts in a usual home. Sine wave inverters are pricier, costing two to three times more than modified sine wave versions. ... For simpler needs like basic appliances, a modified sine wave or square wave inverter could save you money. Here's a table comparing different inverter types. It ...

Pure Sine Wave Inversion. The two common types of wave formers created by inverters are true sine wave and modified sine wave. The second category is one you'll most likely want to avoid. Modified sine wave inverters are less expensive because they're creating what is essentially an imitation of a pure sine wave.

What size pure sine wave inverter should you buy? Pure sine wave inverters come in many sizes and power outputs to satisfy all needs.
