

Can a 12V 100Ah battery be used with a small inverter?

Using 12v 100Ah sealed lead acid batteries with a small inverter or UPS is not ideal. They are not meant for regularly handling high current and being discharged deeply. Even deep cycle batteries will only cycle 220 times if drained to 80% each time. Only using 50% capacity will increase the cycles to between 400 and 700.

How much power does a 12V inverter use?

Example of tested inverters: - Mecer 720W 12v Inverter: The inverter can utilize about 75% of total capacity. Thus less than a 300W load is recommended if you want 3hrs runtime. - Geewiz 720W 12v Inverter: The inverter can utilize about 75% of total capacity. Thus less than a 300W load is recommended if you want 3hrs runtime.

I'm just jumping into the realm of RVing. I bought the Renogy Smart Lithium Iron Phosphate 12V 100AH battery to replace my lead acid battery in my 2013 KZ Durango.
