

St George Solar Tile Manufacturer

What are solar roof tiles?

Solar roof tiles, also known as solar shingles, are a type of roofing material that is designed to generate electricity from the sun's rays. They are similar in appearance to traditional roof tiles, but they have built-in photovoltaic (PV) cells that convert sunlight into electricity.

What are solar shingles & solar tiles?

Solar shingles combine roofing materials and solar modules into one durable building material. This way, the roof can have a beautiful, fully integrated edge-to-edge appearance while still acting as an energy-generating unit. Solar tiles work on the same principle as traditional solar panels.

What is solar tile?

Solar tile, which combines solar panels and roof tiles, integrates photovoltaic and architecture. Crystal silicon photovoltaic technology and building tile structure are innovated to eliminate the complex project of secondary installation and replace traditional cement tiles and clay tiles with one-time paving.
