Why are Chinese-owned solar factories laying off workers in Vietnam?

November 4, 2024 - (Hanoi) Several prominent Chinese-owned solar factories in Vietnam are scaling back production and laying off workers in response to recent expansions of U.S. trade tariffs affecting Vietnam and three other Southeast Asian nations.

How are US tariffs affecting Vietnam's solar industry?

Since 2012, the U.S. has imposed tariffs on solar imports from Southeast Asia, with the latest expansions announced in October following complaints from American manufacturers. The increased tariffs have adversely affected Vietnam's solar sector, resulting in job losses at factories operated by companies such as Longi Green Energy and Trina Solar.

Are Chinese solar companies pursuing new opportunities in Vietnam?

Reports indicate that Longi has cut operations to just one of its nine production lines in Bac Giang province, leading to hundreds of layoffs, while Trina Solar has suspended operations at one of its two factories in Thai Nguyen. Despite these challenges in Vietnam, Chinese solar manufacturers are actively pursuing new opportunities.

Where is Trina Solar based?

A general view of the Chinese solar panel manufacturer Trina Solar's facility in Thai Nguyen, Vietnam, on Aug 30, 2024. (Photo: Reuters) Some of the biggest Chinese-owned solar factories in Vietnam are cutting production and laying off workers, spurred on by the expansion of US trade tariffs targeting it and three other Southeast Asian countries.

Are Chinese solar panels uncompetitive?

The petitioner group, the American Alliance for Solar Manufacturing Trade Committee, accused big Chinese solar panel makers with factories in Malaysia, Cambodia, Thailand and Vietnam of shipping panels priced below their cost of production and of receiving unfair subsidies that make American goods uncompetitive.

Why are Chinese solar companies flocking to Indonesia?

Chinese solar companies are flocking to Indonesia motivated by the tariffs on Vietnam, according to Indonesian industry ministry official Beny Adi Purwanto who cited Thornova Solar as an example.

On August 8, the groundbreaking ceremony for Gstar's Phase one 7GW photovoltaic aluminum frame and mounting system manufacturing base was grandly held in the Vientiane Saysettha Development Zone, Laos. The launch of this project marks a significant step forward in Gstar's vertical integration supply chain layout in Southeast Asia. Aug 25, 2024

Follow our tips and advice on what you should do, plus the questions to ask, before, during and after a visit

# Vientiane pulls solar photovoltaic panels

from a solar PV installer. Before the visit: Check local planning regulations to make sure you're allowed to install a solar PV system (see ...

JinkoSolar and Trina Solar have separately reported that on-field testing shows tunnel oxide passivated contact (TOPCon) solar modules outperform p-type back-contact PV modules in monthly power generation. ... The panels were mounted at a 23-degree tilt angle on cement ground with approximately 30% reflectivity, positioned 0.5 meters above the ...

Solar panels that produce hot water are known as solar thermal collectors or solar hot water collectors. There are a range of technologies which transform the energy from the sun into hot water. Typical well-installed systems will provide up ...

Solar PV Analysis of Vientiane, Laos . Maximise annual solar PV output in Vientiane, Laos, by tilting solar panels 18degrees South. Vientiane, Laos is a good location for year-round solar energy production because it""s in the Tropics

VIENTIANE, Feb. 1 (Xinhua) -- A total of 58 solar power plants have been completed or under construction across Laos with a total installed capacity of 7,656 MW, local daily Vientiane Times reported on Tuesday. Eight of these plants have been ...

Details: Solar Power Solutions Pvt Ltd is one of leading solar installation companies in Laos, specialized in designing and implementing customized solar projects for residential, commercial, and industrial clients. They provides range of services including solar installation, manufacturing and supplying high-quality solar panels.

Notes for Solar Photovoltaic (PV) System Installation". (5) Regardless of the type of the PV system, sufficient maintenance access shall be provided for the circuit breaker panels and distribution boards, and all electrical work on the PV system shall only be carried out by an appropriate Registered Electrical

Vientiane Solar Panels. Clenergy Thailand and EDL-GEN Solar Power announced their partnership on an 85MW solar project in Vientiane, Laos. Representatives from Clenergy Thailand, EDL-GEN Solar Power, and Pattana Energy Absolute Sole attended the signing ceremony. ... Laos near me Thanks to photovoltaic solar panels, you take advantage of the ...

2.6 Guide For Owners - Installation Of Solar Panels or Photovoltaics (PV) 12 2.7 Design and Installation Checklists 13 3 Operation & Maintenance 15 Appendix A: Contact Information 16 Appendix B: Examples of BIPV Applications in Buildings 17. 06 1 Introduction 1.1 Photovoltaic (PV in short) is a form of clean renewable energy. ...

Trump pulls solar manufacturing from Defense Production Act. Mar 21, ... Solar panels by iamme ubeyou. DPA is a law that grants the President powers to ensure the nation's defense by expanding and expediting the supply of materials and services from the domestic industrial base. In the executive order, the President said

## Vientiane pulls solar photovoltaic panels

that the "rescissions ...

The module factory established by LS Solar in the Saysettha Development Zone in Vientiane, Laos, is of great significance. It represents a crucial layout in the Southeast Asian market and demonstrates LS Solar's confidence and commitment to developing the renewable energy industry. The factory is located in the Saysettha Development Zone.

A PV array operating under normal UK conditions will produce many times more energy over its lifetime than was required for its production. Some mistakenly think that PV panels don't produce as much energy as they take to manufacture, but this stems from the very early days of the satellite industry, when weight and efficiency was far more important than cost.

Solar PV panels and inverter are the two major components of a solar PV system. In general, the solar PV panels that are commonly available in the market contains one of the three major types of solar cells, i.e. monocrystalline cells, polycrystalline cells or thin film cells.
