

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Grecell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. What to Know Before Purchasing a Portable Power Station

How do I choose a portable power station?

When selecting a portable power station, it's essential to identify your primary needs and priorities for owning one. Most portable power stations have main common features (such as a battery and ports to pull power from that battery).

Are portable power stations suitable for camping?

Almost all compact portable power stations will be suitable for camping, but I rather like the Bluetti Handsfree 2 for this role - mostly because many of them are big, boxy, unwieldy units that take up a fair amount of space.

Which power pack should I buy?

If you're taking heavier duty electrical items like laptops or portable fridges, check out the EcoFlow Delta - it's a big beast! This super smart and eco-friendly power pack is lightweight and just about portable enough to be carried in a backpack. The small size of the Goal Zero Yeti makes it ideal for camping trips or less demanding hikes.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

How much power does a portable power station need?

Large devices like TVs and mini fridges will require a power station with a capacity of 400 - 500 Wh. Bear in mind that these are often heavier. Models with a three pin AC power outlet will allow you to plug in a variety of devices. Take note of how your portable power station can be charged.

So the real question is: would a power supply like the Corsair CX650X work in Europe if I used a correct power cable I have here laying around? Best regards from Portugal, Aprendiz PS: any improvements suggestions for the parts-list are appreciated
