Armenia has a great potential for solar energy (the average annual value of solar energy flow on 1 m² horizontal ...

shifts for solar energy applications are going on. Installation of solar energy systems in American University of Armenia in is a successful case of solar energy application in former Soviet Union. 3. Hydrogen energy Hydrogen could well become the major component of clean sustainable energy systems in the longer term.

As we learn from the official website of Yerevan Municipality, w ithin the frames of "EU4Yerevan Solar Energy" the elevators of blocks of flats, external lighting systems of yard areas as well as sensor lamps at staircases get their energy supply from solar photovoltaic stations. Green clean energy will enter 90 buildings of the capital.

Armenia has significant solar energy potential. The average annual amount of solar energy flow per square meter of horizontal surface is about 1720 kWh (the European average is 1000 kWh). One fourth of the country's territory is endowed with solar energy resources of 1850 kWh/m 2 /y. In January 2022 37 companies received license for ...

and Broader Energy information Management System oOutcome 2.1. Energy planning and management systems (and Tool) for the buildings sector in Yerevan established. oOutcome 2.2. Replicable model, investment case for use of solar panels in buildings is elaborated. oOutcome 2.3. Solar guidebook for multi apartment residential

Why Choose Solar Energy? Solar energy is the largest and most endless source of energy available. It can be turned into both electricity and heat. Solar panels are about 70% efficient at making heat and around 22% efficient at making electricity. Using solar energy has many benefits, making it a good choice for saving money and being more ...

Solar energy related service of all kinds: from project development for stations to components wholesale. ... specialists have more than 10 years of experience in the field and know all the subtleties of designing and installing solar systems. ... Sundukyan 19/4, 0012 Yerevan, Armenia; Tel: +(374) 99 276 000

Thanks to the EU-funded project EU for Yerevan Solar Community, 90 apartment buildings in Yerevan, Armenia, will switch to renewable energy. The project aims at reduc-ing energy consumption and greenhouse gas emissions in Yerevan with renewable energy sources and energy effi-ciency measures. The energy modernisation measures include the installa-
